

GreenFumeHood

Advanced filtration fume hood

**Comprehensive solution for
green laboratories**

The new generation of GFH

Continuous innovation and safety always on your side!

Erlab has remained the leader in the world for filtered fume hoods, ductless fume hoods, and filtered storage solutions since 1968. Erlab is an innovator committed to safety, performance, energy efficiency and sustainability.

Benefit from Erlab's +50 years of R&D, take advantage of Erlab's latest innovations (more advanced filtration technology, smarter monitoring systems) with the third generation of GreenFumeHood. The alternative to traditional ducted fume hood for new and existing R&D laboratory projects.

Simplify laboratory design

Modularity and flexibility

Energy savings

Suitable for new constructions and laboratory redesign projects

Zero-emission and environmental protection

Adaptable modular filtration column
 Compatible with a vast majority of laboratory procedures

Enhanced filtration system
 Improved filtration efficiency & increased filter lifetime

Inside LED lamp (500 lux)

New Smart Command control module

Transparent acrylic front panel, slide the sash vertically with ease

eGuard real-time remote equipment monitoring system

Side acrylic panels increase visibility

The 4° slanted front panel offers optimal visibility and an ergonomic work space

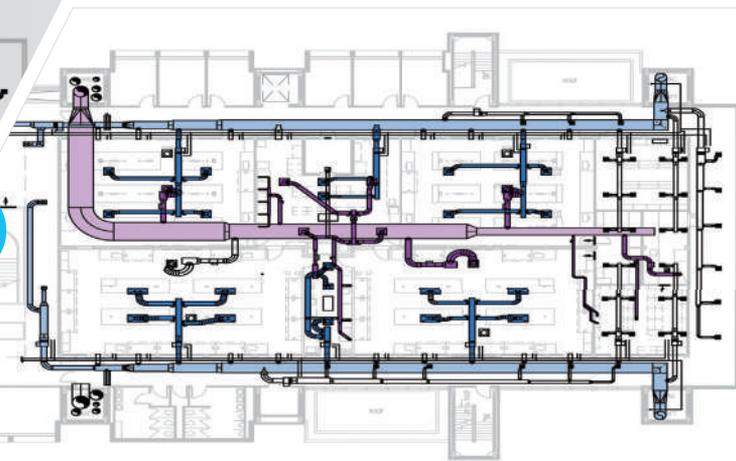

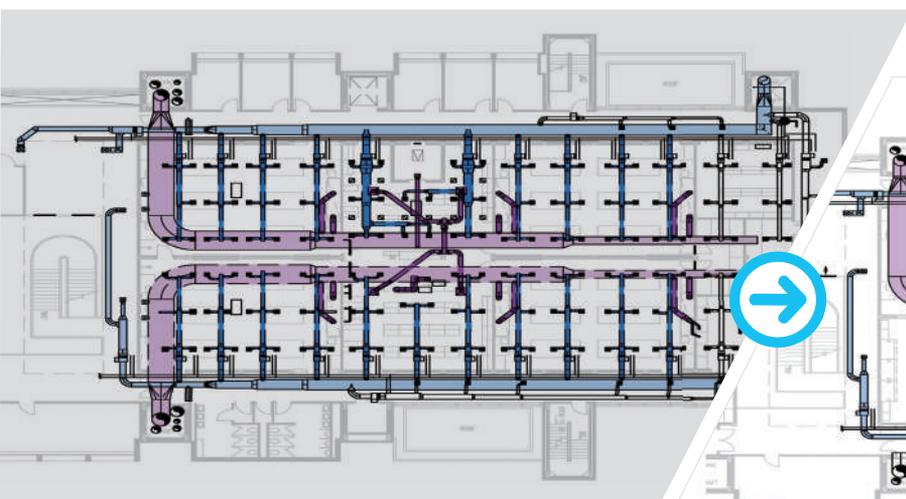

Comparison traditional ducted fume hood and GFH

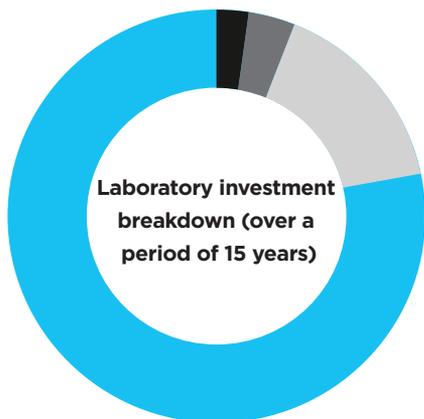

Complex infrastructure design and construction, high operating costs, troublesome maintenance

Streamlined infrastructure design, reduced construction and operating costs, simplified maintenance

*From BSA Lifestructures, Bulter University reconstruction project (Left: before Right: after)

- Energy 78%
- Construction 17%
- Design 3%
- Recycling 2%

Yearly energy cost saving by using a 1.5m ductless fume hood

Area	Sydney	Melbourne	Brisbane
Average cost (\$)	1,771	1,509	2,040

Calculated by Energy Plus based on Simulation Standard of ASHRAF 90.1 Laboratory For VAV Fume Hood
And the energy cost saving varies depending on the exact electricity and gas cost in different cities.

Enhanced filtration system

Improved filtration efficiency & increased filter lifetime

Adaptable modular filtration column

Compatible with a vast majority of laboratory procedures

eGuard App

Smart real-time monitoring management

Smart communication Technology

A simplified human-machine interface dedicated to safety

Compliance with- Standards

Your safety guarantee

1 Neutrodine Unisorb Filter greatly increases the retention capacity for the majority of vapors emitted from a wide variety of laboratory handlings

Cyclohexane
+50%

Acetone
+150%

Ethanol
+280%

- More than 700 chemicals filtered, including molecules known to be the most difficult to retain: polar VOCs with low molar mass and boiling points
- Single filter for simultaneous handling: solvents, acids and bases

2 Modular filtration column - Safe, economical & environment-friendly

- Plug&Play system makes the configuration of the filtration column easier and faster
- Safety filter increases safety, improves filter performance lifespan and reduces operating costs

3 eGuard APP-With eGuard for your smartphone access all your equipment safety settings wherever you are

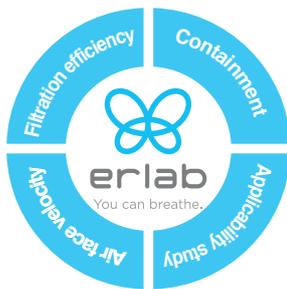

Download the eGuard APP on your smartphone to monitor in real-time all your equipment remotely

4 Smart Command control module - Safe & intuitive

- Simplified connection via NFC Simplified access to advanced functions on smartphones.
- Simplified access point (PC, tablet, etc.) Wi-Fi and Ethernet.
- Simpler safer Smart alert system Detection through light and sound/alerts pulsation.
- Simplified and intuitive commands Touch screen commands.

5 Strict compliance with domestic and international industry standards

 AFNOR NF X 15 211
